- 12. Summian soldiers were the appropriate service color on their equilets, their collar patches and around the edges of their caps. The service color was bright red for infantry units; brown for cavalry units; black for engineer, artillery and armored units; and blue for the sir force. A golden, bursting shall was observed being wern as an insignia by infantrymen. Agine is were crossed-space-and-pike insignia and airmon twin-bladed propeller insignia.
- 13. The troops of all branches and ranks were a cockade of blue, rellow and red, the national colors, surrounded by rellow beans, at the front of their caps. No Soviet star emblems were observed being wern as cap devices by soldiers. No special insignia were observed being wern by the trainees of the infantry officer candidate school in Sibiu. It was commonly noticed that the uniforms of the trainees were of a better quality. Tesides, the trainees usually were service caps and crosscelts with their brown belts. Officers holdin; ranks higher than captain were observed to wear hat cords with gold interlaces with their service caps instead of the usual leather straps.
- 14. Members of the security troops, the Sicuritate, more blue service color on their epaulets, their collar patches and around the edges of their caps. Noither Soviet star emblems nor other insignia differing from the uniforms of the armed forces were observed at those soldiers.
- 15. Source stated that the following streets in the Libiu post were renamed from: Grosser Ring to Piata Republicii; Hermansplatz to Piata Unirii; Rauholzplatz to Piata I May; Porgergasse to Strada Rarl Marx; Schewisgasse to Strada Voroshilov; Heltauer-Stras e to Strada Stalin; Zeughofolatz to Piata Armata; Langgasse to Chausseaua II June; Josefgasse to Calea Viktoriei (formerly also Carmen Sylva-Stras: e); and Roter Turm-Strasse to Calea Irmata Rosie.
